EDUCATION

Vidyalankar Institute of Technology , Mumbai B.E. in Information Technology	2024 – 2027
Government Polytechnic Thane , Mumbai Diploma in Computer Engineering	2021 – 2024

EXPERIENCE

Cybersecurity Intern Secure Cyber Future	Jan 2026 – Present
– Identified and analyzed web application vulnerabilities including SQL Injection, XSS, CORS, and security misconfigurations – Performed VAPT on web applications and APIs using practical security testing workflows – Contributed to threat detection, vulnerability assessment, and mitigation recommendations	
Industrial Trainee (Full Stack) Sumago Infotech Pvt. Ltd, Nashik	Jun 2023 – Jul 2023 View Certificate
– Worked on full-stack web applications including development, testing, and deployment – Gained practical experience in debugging, SDLC, and real-world development workflows – Collaborated in a professional development environment under industry guidance	

PROJECTS

- **DristiScan – AI Code Security Scanner** [GitHub](#)
FastAPI, React, PostgreSQL, Docker, Ollama
 - Built a cloud-based security scanner to automate vulnerability detection across source code and dependencies
 - Implemented static analysis (SAST) with AI-powered explanations for faster vulnerability understanding
 - Generated detailed PDF/JSON security reports with severity scoring, risk insights, and remediation guidance
 - Integrated RAG using OWASP, CWE, and NVD knowledge bases to improve security recommendations
- **College Companion Platform** [GitHub](#)
React, Node.js, PostgreSQL, AWS
 - Developed a full-stack student management platform for attendance tracking, documents, and academic workflows
 - Integrated AWS S3 and RDS for scalable document storage and database management
 - Implemented MFA-based authentication and role-based access control for secure user access
 - Enabled real-time notifications and updates using Socket.io
- **Global Conflict Impact Intelligence Platform** [GitHub](#)
Node.js, FastAPI, MongoDB, React, OpenAI
 - Built an AI-powered geopolitical intelligence platform aggregating multi-source news and risk data
 - Implemented source ranking, event extraction, and AI consensus analysis for reliable intelligence generation
 - Developed ML-based forecasting for economic, commodity, and trade-route impact prediction
 - Integrated interactive maps and dashboards for real-time conflict and risk visualization

- **FormOS – Intelligent Document Processing Platform**

[GitHub](#)

Next.js, Node.js, MongoDB, OCR, OpenAI

- Developed a secure document platform to upload, process, and analyze personal documents using OCR and AI
- Implemented a RAG-based AI assistant to query extracted document data through natural language
- Built a Chrome extension to automate form filling across websites using stored user data
- Designed security-first workflows using JWT authentication, data masking, validation, and encryption

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, SQL, Golang (Basic)
- **Frontend:** React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Cloud & DevOps:** AWS (S3, EC2, RDS), Docker
- **Security Tools:** Burp Suite, SQLMap, Wireshark, Nmap

TRAINING & CERTIFICATIONS

- **Machine Learning with Python – L&T Skill Trainers Academy** [View Certificate](#)
June 2025
- **Blockchain Technology Bootcamp – C-DAC Hyderabad** [View Certificate](#)
Jan 2026
- **Secure AI Web Apps – MERN, Docker, Kubernetes** [View Certificate](#)
March 2025
